Waste Collection Permit Advisory Notes

1. INTRODUCTION

The following advisory notes should be read prior to commencing any waste collection activity.

Amendments have been made to both the Waste Management Act and the Waste Management (Collection Permit) Regulations in 2015 and 2016 which have required a new set of conditions for waste collection permits. These conditions have been included in the enclosed permit.

You must read all the conditions of your permit; these advisory notes aim to assist you in implementing these conditions but are not a legal interpretation of the legislation, regulations or permit conditions.

- Condition 6: Conditions specific to certain waste types.
- Appendices A-D.

3. KEY CONDITIONS TO NOTE ON RECEIPT OF YOUR PERMIT

While you need to read and implement **ALL** the conditions of your permit, your attention is drawn in particular to the following which may require action prior to commencing activities:

8. COORDINATION OF THE ENFORCEMENT OF WASTE COLLECTION PERMITS

The Waste Enforcement Regional Lead Authorities (WERLAs) will have responsibility for coordinating waste enforcement actions within regions, setting priorities and common objectives for waste enforcement, ensuring consistent enforcement of waste legislation across the three existing waste management planning regions while still leaving local authority personnel as first responders on the ground to specific breaches of waste legislation. This is intended to facilitate a transformation from process driven enforcement, structured around separate implementation of individual regulations, to one that focuses greatest effort on the waste problems and issues that matter most and to take swift, proportionate and effective action. To this end the WERLAs and NWCPO will be working closely to ensure a consistent enforcement approach to the Waste Collection Permitting system.
